ABOUT ME

I'm a UX/UI designer with 4+ years of experience creating intuitive, engaging digital products. I specialize in turning complex ideas into clean, impactful designs that users love. Driven by curiosity, I actively leverage AI to streamline my research and rapid sketching, constantly evolving my process to deliver better results through innovation and collaboration.

EXPERIENCE

Product Designer | Tipalti

2025-2026

- Owned the end-to-end design of the Administration domain within an enterprise fintech platform
- Designed complex configuration and permission-based workflows for multi-role environments
- Translated technical and business requirements into scalable, system-level UX solutions
- Collaborated closely with PMs and global R&D teams across sites
- Worked within and contributed to a cross-product design system
- Delivered wireframes, interactive prototypes, and full developer handoff

UX/UI Designer | One BI

2021- 2025

- Led design for complex B2B platforms focused on data visualization, including mashups, web applications, and internal tools
- Designed and maintained components as part of a scalable design system; collaborated with QA and conducted user research
- Created responsive designs for both web and mobile, with an emphasis on usability and accessibility
- Produced low- and high-fidelity wireframes, built interactive prototypes, and conducted user testing
